

TK Development arbejder med udvikling af fast ejendom - nationalt og internationalt - inden for en række fastlagte segmenter. Hovedvægten af aktiviteterne er lagt på etablering af shoppingcentre, storbutikker og domicilejendomme.

Virksomheden har hovedkontor i Aalborg og afdelinger i København, Berlin, Warszawa, Prag, Stockholm, Helsinki, Vilnius, Riga og Sofia.

TK Development er noteret på Københavns Fondsbørs.

TK Development har netop lanceret en ny it-plattform, som skal understøtte og optimere den projektdrevne organisation på tværs af projekter, funktionsområder og geografiske lokaliteter.

Det har været væsentligt for TK Development at give medarbejderne et hurtigt indblik i deres arbejdssituation. Intranettet er dermed blevet medarbejderens indgang til informationer. Portalen, baseret på SharePoint, giver medarbejderen adgang til akkumuleret information omkring fx nyheder, projekter og godkendelse af fakturaer.

Portalen er integreret med de bagved liggende systemer til økonomistyring (Dynamics AX) og projekt- og dokumentstyring (TeamShare).

Informationer er dermed til rådighed for medarbejderne direkte gennem portalen, samt gennem de underliggende specialsystemer.

Welcome to SharePoint and TeamShare – gathering points of all TKD information

As of today, you will experience an improved flow of information in TKD. The instrument is called SharePoint - and you are looking at it right now! Every time you open a browser to access the internet, you will automatically open SharePoint. From SharePoint you have access to TeamShare where all documents concerning projects will be stored. From SharePoint you have access to your invoices, week journal, policies concerning HR and communication. Also, SharePoint is where all TKD news will appear from now on.

Click, to learn more about what SharePoint and TeamShare can do for you - and what you need to do for TeamShare.

Best regards / Frede and Robert

About to happen in TKD

- 16 Oct. Opening of Kolin Shopping Centre (CZ)
- 23 Dec. Interim Report, Q3 2008/09

TeamShare er omdrejningspunktet for organisationen, idet projekter, dokumenter og relationer styres gennem projekt- og dokumentstyringsystemet, TeamShare, udviklet og implementeret af Lector.

The screenshot shows the TeamShare web application interface. The top navigation bar includes 'TEAMSHARE My Work Areas', 'Page 1 of 1', and 'Current User: TK\lector Version 2.1.0.58'. Below the navigation bar is a toolbar with buttons for 'New Work Area', 'Open Work Area', 'Address books', 'Refresh', 'Select Fields', and 'Help'. On the left side, there is a 'Shortcuts' menu with options like 'My Work Areas', 'My Tasks', 'My Customers', 'My Documents', 'Search', 'Search Document', 'Search Work Area', 'Search Contact', 'Advanced Search', and 'Saved Searches'. The main content area displays a table of work areas with the following columns: Work Area ID, Final Date, Title, Type, Owners, Status, Subject, Last Updated, Last Updated By, Created On, and Created By. The table contains 20 rows of data, each representing a different work area with its respective details.

Projektet hos TK Development bekræfter endnu engang, at vi har tolket markedet rigtigt i forhold til vores produkt – TeamShare. Markedet efterspørger i stigende grad konsoliderede platforme for deres vidnehåndtering og procesunderstøttelse. Viden og dokumenter skal kunne konsolideres og kvalitetsikres, således at informationerne respekterer de forretningsmæssige krav og de samme informationer skal fleksibelt kunne tilgås på tværs af kontorværktøjer og arbejdsfunktioner. TeamShare er baseret på Microsoft SharePoint, som netop er en viden-plattform, som integrerer dybt i de øvrige kontorværktøjer fra Microsoft og tilbyder portalfunktionaliteter til fx intranet og extranet – Lector
